MASTER OF SCIENCE IN **COMPUTATIONAL BIOMEDICINE & BIOTECHNOLOGY**

This masters program trains students in translating cutting-edge computational technologies into real-world advances in biomedicine and biotechnology.

Develop. Learn. Advance.

Develop the skillsets for successful careers in healthcare, biotechnology, government, and academia.

Learn to apply cutting-edge computational technologies to real-world biomedicine and biotechnology.

Advance your research portfolio through hands-on training with our computational biology faculty.
