

SELF-REFLECTION QUESTIONNAIRE

1. What causes do you care about/what types of problems do you want to solve?
2. What made you become interested in science initially?
3. How do you define success and career satisfaction?
4. What parts of your current work do you enjoy the most? The least?
5. What can you do better than anyone else/what comes easily to you (both learned and inherent skills)?
6. What do other people tell you you're good at?
7. When are you most "in the zone," during and outside of work?
8. What type of work environment do you prefer? e.g. fast-paced, predictable, collaborative, etc.
9. If you could do any job in the world (without worrying about money, training, etc.), what would you do?
10. Where you do see yourself in 5-10 years (think about your life/work values)?
